

Eurasia Ultimate (EURC)

Tokenomics & Project Notes (public summary)

Generated: 2026-01-03

Important disclaimer

- EURC is NOT a stablecoin and has NO price peg.
- Not affiliated with Circle or any Circle-issued EURC.
- Value is market-driven and determined by participants.

1. Overview

Eurasia Ultimate (EURC) is an independent digital asset project with a neutral, non-promissory positioning. The project does not represent a financial institution, a regulated product, or a stablecoin. This document is a public summary intended for community and listing reviews.

2. Supply & Minting

Total supply and minting parameters are disclosed transparently on-chain. If future chain deployments occur (BNB Chain / TRON), each network contract address will be published on the official website and Telegram channel.

3. Allocation (public summary)

Allocation details are communicated as the project progresses. No claims of backing, reserves, or guaranteed returns are made. Participants should treat EURC as a high-risk digital asset.

4. Market dynamics

EURC price is determined solely by open-market trading and participant activity. There is no peg, no stabilization mechanism, and no centralized commitment to maintain a target price.

5. Official contracts

Ethereum (ERC-20)	0x32b4F2f71476c245fb1876B99551daa2936E63dC
